

JavaScript Cheatsheet

Console Log

```
console.log("Hello internet!");
```

Comments

```
// Single line comments look like this
```

```
/* Multi-line comments look  
something like this */
```

Variables

```
const userId = "1618033988";  
let userName = "Leeroy Jenkins";
```

Data Types

```
let year = 2026;           // Number  
let mealCost = 12.99;      // Number  
const daysOfWeek = 7;      // Number  
  
let message = "good nite"; // String  
let username = "@zuck";    // String  
const company = "Codédex"; // String  
  
let hungry = true;         // Boolean  
let lateToMeeting = false; // Boolean  
const earthIsFlat = false; // Boolean  
  
let date;                  // Undefined
```

Operators

```
let score = 0; // Declare score  
  
score = 4 + 3; // score is now 7  
score = 4 - 3; // score is now 1  
score = 4 * 3; // score is now 12  
score = 4 / 3; // score is now 1.3333  
score = 4 % 3; // score is now 1  
score = 2 ** 2; // score is now 4
```

Conditionals

```
if (ph > 7) {  
  console.log("Basic");  
} else if (ph < 7) {  
  console.log("Acidic");  
} else {  
  console.log("Neutral");  
}
```

Comparison Operators

```
a === b // strict equal  
a !== b // strict not equal  
a > b   // greater than  
a >= b  // greater than or equal to  
a < b   // less than  
a <= b  // less than or equal to
```

Random Number

```
Math.floor(Math.random() * 10); // 0-9
```

Logical Operators

```
a && b // true if both are true  
a || b // true if one is true  
!a     // not true
```

Loops

```
while (coffee < 1) {  
  console.log("Too tired to code ☹️");  
}  
  
for (let i = 0; i < 5; i++) {  
  if (i === 1) {  
    continue  
  }  
  if (i === 3) {  
    break  
  }  
  console.log(i);  
}
```
